

Fossil Finance Violations:

**Tracking Fossil Fuel Projects
that violate commitments to
end international public
finance for fossil fuels**

UPDATED MARCH 2025

This tracker documents known approved or pending fossil fuel projects that violate the [Clean Energy Transition Partnership](#) (commonly referred to as the Glasgow Statement) and near-identical G7 commitment to end international public finance for fossil fuels by the end of 2022. Six countries, including Germany, Switzerland, Italy, the Netherlands, the United States, and Japan, have broken their promise to end international public finance for fossil fuels by the end of 2022. In total, **CETP signatories have approved at least \$4.3 billion in public finance for international fossil fuel projects** since the deadline passed. In addition, while the US was still a signatory it approved \$3.7 billion for 12 projects, and has provided \$4.7 billion for one project since withdrawing. The US remains bound by a near-identical G7 commitment, alongside Japan. Their fossil fuel finance with the CETP signatories' finance brings the total to **\$17.8 billion**.

The countries with repeated violations of their commitment(s) to end fossil fuel finance are:

- **Germany** has approved the most fossil fuel financing, providing \$1.5 billion for 11 projects since the end of 2022.
- **Switzerland** has approved the second most fossil fuel finance of the CETP signatories since the end of 2022 deadline passed, providing a total of \$1.4 billion for 6 projects.*
- **Italy** approved \$1.1 billion in finance for 4 projects in 2023.**
- While still a CETP signatory, **The US** approved the most fossil fuel finance of CETP signatories since the end of 2022 deadline passed, providing a total of \$3.7 billion for 12 projects. In December 2023, US EXIM also provided domestic fossil fuel support of \$90 Million to [Freeport LNG](#). Since leaving the CETP in February 2025, the US has provided [\\$4.7 billion](#) for Mozambique LNG, a project [mired in allegations of human rights violations](#).
- Japan has provided at least \$5 billion in finance for 15 fossil fuel transactions since the end of 2022.

**Due to a lack of transparency in SERV's reporting, we are issuing the following clarifications: All amounts posted by SERV are the contract value and not the value of their guarantees, which can be lower. However this value is not made publicly available. As such we report on the contract value that is made available.*

We had previously listed the Kiyaly CCPP project as \$2.4 billion based on what SERV reported here, however, we have updated the figure to \$293 million to reflect that SERV only provided insurance for a small portion of the overall cost.

***We had previously listed the Talara refinery in Peru as an approved project, however, [this finance did not end up going through](#) due to strong Indigenous led pressure and has been removed.*

Germany

Financing Country & (Institution)	Project	Approval Date	Project Location	Sector	\$ USD millions
Germany (KfW IPEX Bank + Trade Allianz)	Angora CCGT Power Plant	2024/12/12	Uzbekistan	Gas	\$389 with Guarantee from Allianz Trade
Germany (KfW IPEX Bank)	Acquisition of 70% in Adriatic LNG Terminal and Regasification Facility	2024/12/03	Italy	Gas	\$45
Germany (KfW IPEX Bank)	Evos Refinancing 2024	2024/08/14	Netherlands	Gas	\$61
