

WE CAN PAY FOR IT

TAX THE RICH
\$3.5 TRILLION

DEBT JUSTICE
\$608 BILLION

DEFUND WAR
\$280 BILLION

\$1.1 TRILLION

FAIR CORPORATE TAXES

MAKE POLLUTERS PAY

\$1.1 TRILLION

Rich countries can unlock \$6.6 trillion in public money annually for climate justice by ending fossil fuel handouts, making big polluters pay, and reforming unfair finance rules.

ENERGY FOR PEOPLE NOT PROFITS!

The fossil fuel companies and banks that created the climate crisis won't be the ones to solve it. We need fair public funding and planning to end fossil fuels and build affordable renewables in their place.

CLIMATE REPARATIONS & DEBT JUSTICE NOW!

The public money we need to pay for climate action is up for grabs. To free up the funds, rich country governments need to do three things: implement these measures at home, stop blocking reforms to global finance rules, and pay their fair share of global climate finance in grants (not loans!).

WHAT'S IN \$6.6 TRILLION?

TAX THE RICH: Tax billionaires & multimillionaires

MAKE POLLUTERS PAY: Stop funding fossils & tax polluters

FAIR CORPORATE TAX: Set minimum tax rates & stop evasion

DEBT JUSTICE: Cancel unfair public debt payments

DEFUND WAR: Cut military spending by 20%
